## Příliš horký brambor?

Anglicky, simultánní tlumočení do češtiny.

V roce 2015 se všechny státy dohodly spolupracovat na udržení globálního oteplení pod hranici 2 °C. Vyžaduje to zásadní transformaci v sektorech energetiky, průmyslu, zemědělství, potravinářství i lesnictví. Jedna z největších výzev současnosti je zvládnutelná, ale vyžaduje výrazné změny všude na světě. Na listopadové globální klimatické konferenci v marocké Marakéši bude hodnocen pokrok, jehož bylo dosaženo od přijetí Pařížské dohody. Jaký typ leadershipu změna klimatu vyžaduje? Čeho lze dosáhnout technologiemi, inovacemi a dostatečným financováním? Pohledy expertů z Maroka, Nizozemska a Česka.
